

## FORMULA 4

### SINGLE SEATER

The Formula 4 car was designed by Ralph Firman, co-founder of reputed single-seater manufacturer Van Diemen. It's the real deal, with an advanced spaceframe chassis and state-of-the-art features such as a paddleshift gearbox controlled via a Cosworth Electronics multi-display steering wheel.

These vehicles were raced in the BRDC F4 Championship, Britain's top single-seater championship, as recently as September 2015, meaning guests will sit in the very same cockpit that has housed the last two winners of the prestigious McLaren Autosport BRDC Award for young drivers.

Engine:	Duratec 2.0i - Cosworth Electronics
Chassis:	FIA Specification Spaceframe
Gearbox:	6-speed SADEV with paddle-shift
Max power:	185bhp @ 6600 rpm
Top Speed:	165mph
